

Feely Bag

Phase 1

Activities to try:

- Put your hand in the bag and make a sound with one of the objects. Ask your child to describe the sound and guess what is making it. Can they imitate the sounds with their voices?
- Experiment with making different sounds with the objects. Talk about which object makes the loudest/quietest sound

What is your child learning?

- Discriminating between different environmental sounds
- Listening carefully to sounds and developing the vocabulary to describe them
